**RE COMPLETED HOSPITALS UNDER AGENDA 111**

The attention of the Ministry of Health has been drawn to a publication on page 11 of the Ghanaian Times dated Tuesday, 4th March 2025, in which the former Minister of Finance, Hon. Dr. Amin Adams, claimed that three hospitals under the Agenda 111 project were successfully completed, equipped, and commissioned before the previous government left office.

He further stated that a dedicated funding source of \$1.3 billion had been secured to complete all remaining Agenda 111 hospital projects.

The Ministry wishes to categorically refute these claims and urges the general public to disregard them.

On 3rd March 2025, the Minister for Health visited Trede in the Atwima Kwanwoma Municipality and Kokoben in the Oforikrom Municipality of the Ashanti Region to assess the current state of the Agenda 111 hospitals.

During the visit, it was discovered that there was no medical gas system, imaging equipment, mortuary equipment, solid waste management, ophthalmology and medical furniture, dental equipment, ENT equipment, lab equipment, theatre equipment, etc.

Again, the Ministry brings to the attention of the general public the following:

1. The previous government spent \$400 million on the Agenda 111 project.
2. Out of the 111 district hospitals committed to construction, none is currently operational.
3. The estimated cost to complete the project now stands at \$1.589 billion.
4. Although Trede, Kokoben, and Ahanta hospitals were commissioned by former President Nana Addo Dankwa Akufo-Addo, the project is still under construction with an overall completion rate of 95%.
5. No medical equipment has been installed, and some laboratory facilities are still under construction.
6. The hospitals have not been handed over to the Ghana Health Service for operation.
7. The estimated cost to make Trede, Kokoben and Ahantan facilities operational is \$8.03 million each.

Per the above stated facts, the Ministry emphasizes that the assertion by the former Finance Minister, Hon. Dr. Amin Adams, that these hospitals were completed and equipped before commissioning, is inaccurate and a calculated attempt to mislead the general public.

The Ministry remains committed to ensuring the timely completion and full operationalization of the Agenda 111 hospitals to improve healthcare delivery across the country. We appreciate the patience and support of the general public as we work towards achieving this goal.
